

# SIMPLE SML NAVAL

Level switch

## GENERAL CHARACTERISTICS

This rugged construction level switch has developed looking to naval needs application. It offers the most reliable solution for the control of liquids in the applications where it is needed a lateral mounting level switch. The standard version has a square flange connection, but a several other type of fixing are possible on request.

- Stainless steel – AISI 316
- SPDT reed contact
- Maximum working pressure 25 Bar
- Maximum working temperature 150 °C
- Degree of protection IP65
- ATEX Exia or Exd construction are available
